

CLUB TABLE

Having adopted its formal distinctive base design, the Club Table also perfectly complements the Club Chair - making it a strong unit. The Club Tables can

also be combined with PARCS American Diner and Wing Sofa or generally as side table or small meeting table.

Design: Pearson Lloyd

bene

INSPIRING OFFICES. SINCE 1790.

PRODUCT DESCRIPTION

- 1 **Table top:** available in 25 mm veneered MDF, 13 mm melamine compact top or 19 mm melamine chipboard.
- 2 **Column:** in metal white or black matt powder-coated or CR chrome, diameter: 50 mm
- 3 **Table base with plastic glides:** cast aluminium in polished aluminium, white or black matt powder-coated, 4-star. Only the polished aluminium table base can be used if selecting the column in CR chrome base.

THE BENE RESPONSIBILITY

Bene plays a pioneering role in the field of sustainability. This spans all company divisions – from product development, procurement, production, and logistics to product recycling. From the first sketch through to series production, ecological requirements are always an important factor in the product development process. It includes selecting environmentally compatible materials, such as certified timbers from sustainably managed forests, using recycled materials and increasing the use of renewable raw materials. Other important requirements for a sustainable product design are labelling the materials, their ability to be repaired, and a long service life for the components used, with the aim to integrate them into a second product life cycle.

To guarantee a high recyclability standard for our products at the end of their service life, we avoid composites as much as possible and develop furniture that allows for disassembly by material type.

Bene products are sourced and made in Europe. 99.9% of all deliveries reach us from a European country. Around 94% of all raw material supplies come from Austria and Germany. Around 93% of the raw materials comes from suppliers within 500 kilometres of our production site.

SUSTAINABLE RAW-MATERIALS

At Bene, the following materials are used as a matter of course:

- chipboards low in formaldehyde
- glues low in formaldehyde
- water-based varnish systems
- recyclable materials
- materials with a high recycling share
- PVC-free synthetics

Bene guarantees products free from:

- CMR substances
- halogenated solvents in synthetics
- chlorinated hydrocarbons
- heavy metal pigments
- materials with azo pigments
- Coatings with biocidal effects (such as wood preservatives, pesticides).

CONTRIBUTION TO BUILDING CERTIFICATIONS

In the context of ecological building certification, design systems such as furniture and dividing walls help to achieve a good result and a higher score.

Bene's products make a contribution towards the LEED, WELL Building Standard, DGNB, BREEAM, etc. certifications. Criteria include, for example, environmental product declarations, indoor air quality, acoustics and convertibility.

PARCS CLUB TABLE

Example configuration

- Club Table Big
- Rectangle
- 1.250 x 800 x 1.116 mm
- Melamine, chipboard 19 mm
- Total weight 27,36 kg

Environmental key figures

- 96,0 % sortable by type
- 91,4 % recyclable
- 60,2 % of contents are renewable raw materials
- 44,3 % recycled production materials

Materials

On request, Environmental Product Declarations (EPD, LCA) – at Bene we call them Life Cycle Data Sheets – can be provided for all standard product configurations.

A list of product-specific certificates and design awards can be found on the Bene product website.
