Information

Wood is a natural product whose growth might result in colour differences and irregularities. The wood is subject to differences in structure and colour between parts of one furniture item or compared to other furniture items of the same material. As long as they remain within the nature of the materials used and are customary in trade, they do not constitute cause for a warranty claim.

To satisfy the visual standards, SIDE_S is deliberately made with plywood and may contain knots as well as cracks. These design characteristics are proof of authenticity and not a valid reason for complaint.
