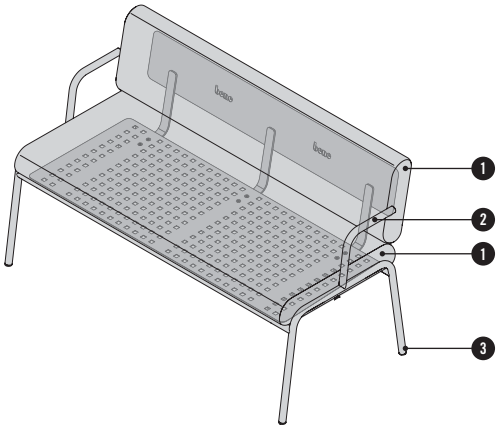
CASUAL OUTDOOR

MANY WAYS TO MEET

CASUAL OUTDOOR is the weatherresistant version of the CASUAL by Bene collection and is perfect for outdoor use. It‘s designed to take your productivity and relaxation to the next level! Whether you‘re working, taking a break, or hosting guests, our outdoor furniture is the perfect solution for those who want to enjoy fresh air and sunshine. CASUAL OUTDOOR is designed to provide optimal comfort, allowing you to work, rest or socialize with ease!

Design : Christian Horner

PRODUCT DESCRIPTION

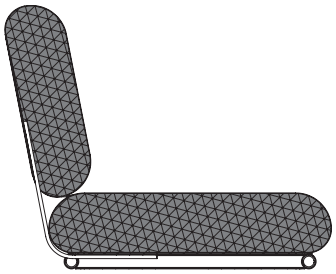


CASUAL OUTDOOR BENCH

1. **Seat and backrest:** the substructure consists of an open-pored outdoor foam padding that enables the water to permeate. This ensures rapid drying within a short time, even when the furniture is completely drenched. The cover is easy to remove by means of a zip and can thus also be washed. A Velcro fastener on the seat or backrest enables quick and effortless removal of the cushions.
2. **Armrest:** optional, of zinc-coated steel and black, clay or jade green powder-coated.
3. **Legs:** of zinc-coated steel in black, clay or jade green powder-coated. Available as a standard or connection leg. With plastic glides.

Covers are available in the fabric collection Panama or Artisan by Agora.
Season: spring / summer, remove the pads overnight or when it rains
Colour configuration options: single-coloured or different colour for recessed elements.

UPHOLSTERY OF SEAT SURFACE AND BACKREST



Open-pored outdoor foam padding

THE BENE RESPONSIBILITY

Bene plays a pioneering role in the field of sustainability. This spans all company divisions – from product development, procurement, production, and logistics to product recycling. From the first sketch through to series production, ecological requirements are always an important factor in the product development process. It includes selecting environmentally compatible materials, such as certified timbers from sustainably managed forests, using recycled materials and increasing the use of renewable raw materials. Other important requirements for a sustainable product design are labelling the materials, their ability to be repaired, and a long service life for the components used, with the aim to integrate them into a second product life cycle.
To guarantee a high recyclability standard for our products at the end of their service life, we avoid composites as much as possible and develop furniture that allows for disassembly by material type.
Bene products are sourced and made in Europe. 99.9% of all deliveries reach us from a European country. Around 94% of all raw material supplies come from Austria and Germany. Around 93% of the raw materials comes from suppliers within 500 kilometres of our production site.

SUSTAINABLE RAW-MATERIALS

At Bene, the following materials are used as a matter of course:
- chipboards low in formaldehyde
- glues low in formaldehyde
- water-based varnish systems
- recyclable materials
- materials with a high recycling share
- PVC-free synthetics

Bene guarantees products free from:
- CMR substances
- halogenated solvents in synthetics
- chlorinated hydrocarbons
- heavy metal pigments
- materials with azo pigments
- Coatings with biocidal effects (such as wood preservatives, pesticides).

CONTRIBUTION TO BUILDING CERTIFICATIONS

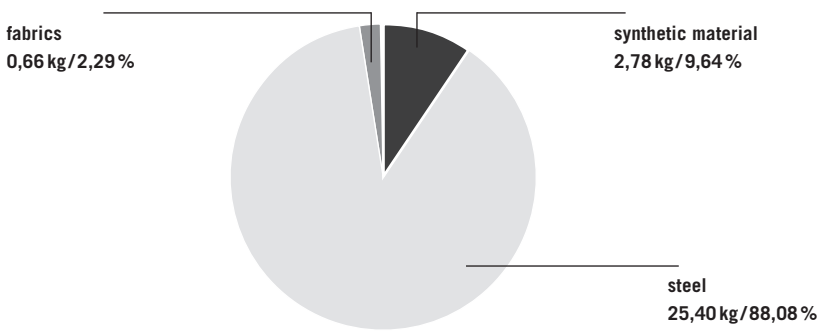
In the context of ecological building certification, design systems such as furniture and dividing walls help to achieve a good result and a higher score.
Bene's products make a contribution towards the LEED, WELL Building Standard, DGNB, BREEAM, etc. certifications. Criteria include, for example, environmental product declarations, indoor air quality, acoustics and convertibility.

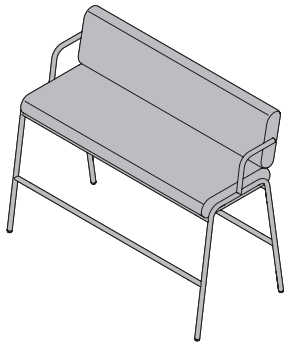
CASUAL OUTDOOR

Example configuration
- Double Bench High
- with backrest
- with armrests
- total weight 28,84 kg

Environmental key figures
- 100 % sortable by type
- 90,4 % recyclable
- 2,3 % of contents are renewable raw materials
- 39,57 % recycled production materials

Materials





For each standard product configuration, Environmental Product Declarations (Lifecycle Data Sheets / LCDS) can be provided. These are prepared in accordance with EN ISO 14040, EN ISO 14044 and the applicable Product Category Rules (PCR) of the International EPD® System for UN CPC 3811, 3812 and 3814.

The LCDS include the Product Carbon Footprint (PCF) covering the entire life cycle (cradle-to-cradle).
