

PORTS CHAIR

Collaboration, personal interactions and a sense of mutual appreciation offer stability in a dynamic working environment. PORTS Chair – the Premium chair with an upholstered seat shell and integrated armrest – complements the PORTS product family. Together with the PORTS Sofa and PORTS Lounge

Chair, it creates comfortable seating landscapes. The different base frames in combination with a large selection of fabric colours allow for individual configurations. PORTS Chair is an ideal companion in management and meeting areas, but also as an elegant dining chair for the home.

Design: Pearson Lloyd

INSPIRING OFFICES. SINCE 1790.

PRODUCT DESCRIPTION

- 1 **Seat and back shell:** the seat consists of a plywood core with a soft foam cover, while the back shell is made of a hard foam support with soft foam on the inner side. Optionally available with standard foam or flame-resistant polyurethane foam (CRIB 5), covered with fabric or leather. The inner and outer colour of the chair can be configured in the same or different colours.
- 2 **Frame:** optionally available with a chair base on glides (felt or plastic) or castors (hard castors for soft floors or soft castors for hard floors), with a four-leg base made of steel or wood. Each metal frame is made from aluminium, die casting or steel tube and powder-coated, the four-leg base is made of wood.

The chair base versions with castors and with glides are continuously height-adjustable by means of a gas pressure spring and the seat shell can rock backwards by up to 12°. The chair with the chair base on glides is additionally equipped with a return mechanism.

Height adjustment

Return mechanism

Lean back function 0-12°

FABRIC AND LEATHER

Various fabric collections are available for the cover: Step, Step Melange, Remix, Europost, Mainline Flax, Assam, Fiord, Steelcut, Stamskin Top, Fox, Divina Melange, Divina MD, Steelcut Trio, Hallingdal, Coda, Elle, Opera.

Various leather collections: Ultra, Spectrum.

More information about the specific fabric and leather collections is available at www.bene.com.

THE BENE RESPONSIBILITY

Bene plays a pioneering role in the field of sustainability. This spans all company divisions – from product development, procurement, production, and logistics to product recycling. From the first sketch through to series production, ecological requirements are always an important factor in the product development process. It includes selecting environmentally compatible materials, such as certified timbers from sustainably managed forests, using recycled materials and increasing the use of renewable raw materials. Other important requirements for a sustainable product design are labelling the materials, their ability to be repaired, and a long service life for the components used, with the aim to integrate them into a second product life cycle.

To guarantee a high recyclability standard for our products at the end of their service life, we avoid composites as much as possible and develop furniture that allows for disassembly by material type.

Bene products are sourced and made in Europe. 99.9% of all deliveries reach us from a European country. Around 94% of all raw material supplies come from Austria and Germany. Around 93% of the raw materials comes from suppliers within 500 kilometres of our production site.

SUSTAINABLE RAW-MATERIALS

At Bene, the following materials are used as a matter of course:

- chipboards low in formaldehyde
- glues low in formaldehyde
- water-based varnish systems
- recyclable materials
- materials with a high recycling share
- PVC-free synthetics

Bene guarantees products free from:

- CMR substances
- halogenated solvents in synthetics
- chlorinated hydrocarbons
- heavy metal pigments
- materials with azo pigments
- Coatings with biocidal effects (such as wood preservatives, pesticides).

CONTRIBUTION TO BUILDING CERTIFICATIONS

In the context of ecological building certification, design systems such as furniture and dividing walls help to achieve a good result and a higher score.

Bene's products make a contribution towards the LEED, WELL Building Standard, DGNB, BREEAM, etc. certifications. Criteria include, for example, environmental product declarations, indoor air quality, acoustics and convertibility.

PORTS CHAIR

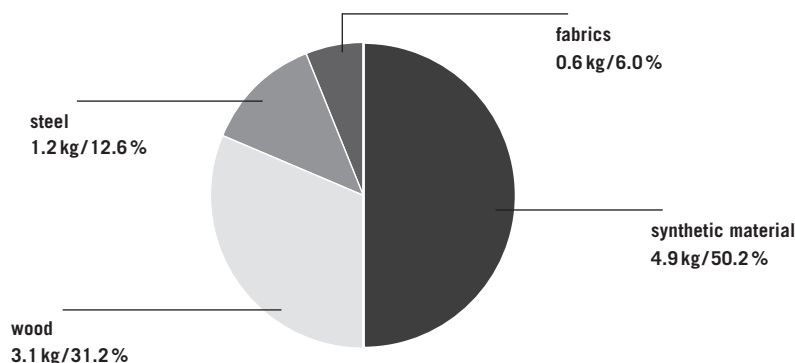

Example configuration

- 4-leg frame (wood)
- natural fibres
- total weight 9,8 kg

Environmental key figures

- 99,9 % sortable by type
- 50,7 % recyclable
- 37,3 % of contents are renewable raw materials
- 5,7 % recycled production materials

Materials

On request, Environmental Product Declarations (EPD, LCA) – at Bene we call them Life Cycle Data Sheets – can be provided for all standard product configurations.

A list of product-specific certificates and design awards can be found on the Bene product website:
