

# SETTLE

## SPACE FOR ENCOUNTER

Settle down, get comfy, and engage with colleagues. With its soft shapes and high quality materials, Bene's upholstered furniture range brings a homely feel to the office. SETTLE consists of individual furniture elements as well as optional modular components that can be combined to create a wide variety of different settings. An optional high backrest can be added to provide additional screening and to incor-

porate a work ledge to create a dynamic room setup. Integrated plug boards enable access to the network and power, allowing for media-supported collaboration. SETTLE can be used in a variety of zones and areas in modern office layouts and works perfectly in combination with other existing Bene product ranges, such as NOOXS, TIMBA, and PARCS.

**Design: Pearson Lloyd**

**bene**

**INSPIRING OFFICES. SINCE 1790.**

## PRODUCT DESCRIPTION

- ❶ **Back panel:** The substructure is made of plywood.
- ❷ **Back Panel Connection Plate**

## THE BENE RESPONSIBILITY

Bene plays a pioneering role in the field of sustainability. This spans all company divisions – from product development, procurement, production, and logistics to product recycling. From the first sketch through to series production, ecological requirements are always an important factor in the product development process. It includes selecting environmentally compatible materials, such as certified timbers from sustainably managed forests, using recycled materials and increasing the use of renewable raw materials. Other important requirements for a sustainable product design are labelling the materials, their ability to be repaired, and a long service life for the components used, with the aim to integrate them into a second product life cycle.

To guarantee a high recyclability standard for our products at the end of their service life, we avoid composites as much as possible and develop furniture that allows for disassembly by material type.

Bene products are sourced and made in Europe. 99.9% of all deliveries reach us from a European country. Around 94% of all raw material supplies come from Austria and Germany. Around 93% of the raw materials comes from suppliers within 500 kilometres of our production site.

### SUSTAINABLE RAW-MATERIALS

At Bene, the following materials are used as a matter of course:

- chipboards low in formaldehyde
- glues low in formaldehyde
- water-based varnish systems
- recyclable materials
- materials with a high recycling share
- PVC-free synthetics

Bene guarantees products free from:

- CMR substances
- halogenated solvents in synthetics
- chlorinated hydrocarbons
- heavy metal pigments
- materials with azo pigments
- Coatings with biocidal effects (such as wood preservatives, pesticides).

### CONTRIBUTION TO BUILDING CERTIFICATIONS

In the context of ecological building certification, design systems such as furniture and dividing walls help to achieve a good result and a higher score.

Bene's products make a contribution towards the LEED, WELL Building Standard, DGNB, BREEAM, etc. certifications. Criteria include, for example, environmental product declarations, indoor air quality, acoustics and convertibility.

## SETTLE

### Example configuration

- SETTLE 3-seater
- With side armrest
- 1.800 x 814 mm
- Total weight 65,94 kg

### Environmental key figures

- 99,5 % sortable by type
- 91,6 % recyclable
- 56,9 % of contents are renewable raw materials
- 10,8 % recycled production materials

### Materials

On request, Environmental Product Declarations (EPD, LCA) – at Bene we call them Life Cycle Data Sheets – can be provided for all standard product configurations.

A list of product-specific certificates and design awards can be found on the Bene product website.
