T-PANEL BASIC

The T-Panel Basic creates workspaces and enables concentrated work. With its slimline appearance and rounded top edge, it conveys a modern character and enhances any workplace. The optional organisation rail allows it to be extended with various accessories. The design allows the fabric cover to be replaced if it becomes soiled or damaged and is synonymous with durability. Thanks to the use of fewer materials, a high proportion of natural materials and the ability to separate and recycle all components by type, the table panel is particularly sustainable. Its slim design and textile surface harmonise with various furnishing styles and offer flexible application options.
