More information about the specific fabric and leather collections is available at www.bene.com.

SUSTAINABILITY

From the specifications stage through to series production, ecological requirements are always an important factor in the development process. This includes selecting environmentally compatible materials, such as CoC-certified timbers from sustainably managed forests, using recycled materials and increasing the use of renewable raw materials. In order to guarantee a high recyclability standard for our products, we avoid composites as much as possible and develop furniture that allows for disassembly.

Labelling of materials, their ability to be repaired, and a long service life for the components used, are other important requirements for product design. But the ability to disassemble and recycle the products at the end of their lives are also important criteria.

SUSTAINABLE RAW-MATERIALS

At Bene, the following materials are used as a matter of course:

- chipboards low in formaldehyde
- glues low in formaldehyde
- water-based varnish systems
- recyclable materials
- materials with a high recycling share
- PVC-free synthetics

Bene guarantees products free from:

- CMR substances
- halogenated solvents in synthetics
- chlorinated hydrocarbons
- heavy metal pigments
- materials with azo pigments
- Coatings with biocidal effects (such as wood preservatives, pesticides).

CONTRIBUTION TO BUILDING CERTIFICATIONS

In the context of ecological building certification, design systems such as furniture and dividing walls help to achieve a good result and a higher score.

Bene's products make a contribution towards the LEED, Well Building Standard, DGNB, BREEAM, etc. certifications. Criteria include, for example, environmental product declarations, indoor air quality, acoustics and convertibility.

CUSHIONS BY BENE

Example configuration

- 100 % Naturlatex „Flakes“ (Post Industrial Recycling)
- with zipper
- set of up to 3 pieces
- total weight 0,65 kg

Environmental key figures

- 100 % sortable by type
- 22,2 % recyclable
- 0 % of contents are renewable raw materials
- 99,1 % recycled production materials

Materials

Synthetic material
0,15 kg / 23,07%

Fabric
0,50 kg / 76,92%

On request, Environmental Product Declarations (EPD, LCA) – at Bene we call them Life Cycle Data Sheets – can be provided for all standard product configurations.

A list of product-specific certificates and design awards can be found on the Bene product website.
